

STORY 1 — Business Insights & Analysis

1. Case Study Title:

Fleet Performance & Revenue Analysis

2. Objective of the Case Study:

To evaluate how effectively the fleet (vehicles & drivers) performs in terms of distance covered, trips completed, and revenue generated, and identify operational patterns, top performers, and anomalies to support strategic fleet planning.

3. Key KPIs / Metrics Analyzed:

- Sum of Distance (km)
- Sum of Trips
- Sum of Revenue (₹)

4. Insights Observed:

Insight 1 — Top Performing Vehicles

Vehicles V001, V005, V003, V002 show the highest distances traveled and revenue contribution, indicating optimal usage and strong operational efficiency.

Insight 2 — Underutilized Vehicles

Vehicles V008, V009, V010 have significantly lower distance and trip counts, indicating potential idle time or operational issues.

Insight 3 — High-Performing Drivers

Drivers Deepa, Priya, Kiran, Sita, Raj contribute the majority of total fleet distance, trips, and revenue.

Insight 4 — Low-Performing Drivers

Drivers like Anil, Arun, Meena show minimal contribution.

Insight 5 — Revenue Correlation

Higher trips and distance consistently correlate with higher revenue.

Insight 6 — Overall Revenue Snapshot

The fleet generated ■399K total revenue.

5. Business Value / Decision Making:

Business Impact 1 — Fleet Optimization

Helps in workload balancing and improving resource utilization.

Business Impact 2 — Driver Performance Management

Assists in targeted training, route allocation, and performance rewards.
